Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/997,952

Applicant(s)

EICHENAUER, HERBERT

Examiner

Jeffrey C. Mullis

Art Unit

1711

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on 01 June 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10, 12, 13, 18-24 and 26-44 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 27, 43 and 44 is/are allowed.
- 6) ☒ Claim(s) 1-10, 12, 18-24, 26, 28-34 and 39-42 is/are rejected.
- 7) ☒ Claim(s) 13 and 35-38 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 1711

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-10, 12, 18-24, 26, 28-34, 39-42 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 6716916. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent claims recite at least one graft copolymer and in fact patent claim 3 even recites "at least two rubber lattices".

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1711

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 6 - 10, 12, 18- 24, 26, 28 -34 and 39 - 42 are rejected under 35

U.S.C. 102(b) as being anticipated by Sun et al. (WO 01/16230).

It is noted that Sun et al. corresponds to United States patent 6, 716, 916 as evidenced by the cover sheet of the US patent. As the United States patent is in English the United States patent will be referred and not the pct patent.

Sun et al. disclose a process in which bimodal polybutadiene latex is grafted with styrene and acrylonitrile in applicants amounts. Since bimodal latex contains two rubber particles, one particle could be said to correspond to the rubber in applicants part " A" the other particle could be said to correspond to the rubber and applicants part " B" . Note that the particle diameters recited in example one correspond to applicants' particle diameters where diameters are recited. Note that the latex in example one is first grafted with peroxydisulfate and then in the presence of ascorbate and hydroperoxide, i.e. the second step corresponds to a redox reaction. Note claim one of the patent which discloses that the latex utilized has a glass transition of less than 0°C.

Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sun et al., cited above.

Sun et al. does not disclose any examples containing the specific amounts of monomers of claims 3-5 with the specific monomers in claims 3- 5. However column 4 lines 12 -- 20 of sun et al. specifically disclose use of such monomers amounts of monomers recited in these claims. Hence it would've been obvious to a practitioner having an ordinary skill in the art at the time of the invention use applicants' amounts of monomers and applicants' monomers in the expectation of adequate results absent any showing of surprising or expected results.

Applicant's arguments filed 6-1-05 have been fully considered but they are not persuasive. With re to Sun, claim 3 of the patent uses two grafted rubbers and applicants claims do not require that they be produced separately. Both grafted rubbers are produced using persulfate as required by applicants step "A" and both rubbers are grafted using redox initiator as requirited by applicants step "B". The examples of patentees use polybutadiene latex, a material with inherently very low glass transition.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 1711

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Jeffrey C. Mullis at telephone number 703 308 2820.
